EDUCATION

Missouri University of Science and Technology — B.S. Computer Science May 2027
Concentration: Artificial Intelligence & Machine Learning Rolla, MO
• Coursework: Data Structures & Algorithms, Statistics, Linear Algebra, Deep Learning, NLP, Statistical Machine Learning

RESEARCH EXPERIENCE

FarmVates Research Group — *Undergraduate Researcher* Nov 2025 – Present
• Built domain-randomized sticky-trap synthetic image pipelines (Python, Blender/GLB, TripoSR) for cucurbit pest detection under scarce labeled real data.
• Trained and ablated YOLOv11 models (PyTorch / Ultralytics) through the SynthPest pipeline with sticky-trap fine-tune; my SynthPest sticky-FT model reached P/R/F1 **0.93/0.85/0.89** on held-out real val (production Inferer reference ~0.95/0.89/0.92) on Missouri S&T GPUs.
• Instrumented experiment logging, dataset prep, and domain-gap tooling; contributing to the SynthPest synthetic-insect data framework paper.

ENGINEERING PROJECTS

FarmVates Edge-to-Cloud Imaging Platform — *Firmware & Systems* 2025 – 2026
• Shipped Pico 2 W (RP2350) camera firmware: ArduCAM OV2640 capture, Wi-Fi MQTT and cellular upload, OLED/watchdog/power-save duty cycles (C/C++, Pico SDK).
• Designed cellular OTA with A/B flash partitions, HTTPS manifest versioning, modem HTTPTOFS download, SHA256 verify, and inactive-slot UF2 programming.
• Implemented on-device scene-change gate (160×120 → 96×96 Y, SSIM/MAE ablations) to skip redundant UXGA + radio; field-scored 245 uploaded frames with offline ROC tools.
• Contributed to cloud path: ZeroMQ/Redis message worker, PyTorch dark-image CNN gate before YOLO inference, Docker/Jenkins services, Flask/Mongo APIs, SwiftUI iOS client.

MontageAI — *Independent AI Desktop App (in progress)* 2026
• Built a working Electron + React + FastAPI montage editor: project shell, media analysis pipeline, and editable AI plan objects (scoring, highlights, music sync, pacing) — not a one-click black-box render.
• Added Albion-focused detectors (combat timelines, abilities, bomb fusion, searchable highlights); full export/polish roadmap remains in progress.

Simply Natural — *Website Designer & Maintainer* Aug 2021 – Present
• Maintain production WordPress site integrated with LightSpeed POS for live inventory.

SKILLS

Languages: Python, C/C++, TypeScript, Swift, SQL
AI / CV: PyTorch, Ultralytics YOLO, OpenCV, scikit-learn, CUDA, synthetic data / domain randomization
Systems: Pico SDK, MQTT, cellular modems, OTA, Docker, Redis, ZeroMQ, Flask, FastAPI, MongoDB, Jenkins, S3
Product: Electron, React, SwiftUI, Git/Linux
